

DWA_03.5 Knowledge Check_DWA3.2

1. User story(ies) in Gherkin syntax for the "+" button.

Scenario: User increments the tally count

Given that I am on the Tally Count App counter screen

When I click on the "+" button

Then the displayed tally count should increase by one

Scenario: User increments the tally count with 200 as maximum value

Given I am on the Tally Count App counter screen

And the current count is 200

When I click the "+" button

Then the "+" button should be disabled and the displayed count should remain 200

2. User story(ies) in Gherkin syntax for the "-" button.

Scenario: User decrements the tally count

Given that I am on the Tally Count App counter screen

When I click on the "-" button

Then the displayed tally count should decrease by one

Scenario: User decrements the tally count with 0 as minimum value

Given I am on the Tally Count App counter screen

And the current count is 0

When I click the "-" button

Then the "-" button should be disabled and the displayed count should remain 0
